

ECOVILLE

the farm

*“In an age of acceleration,
nothing can be more exhilarating
than going slow.
And in an age of distraction,
nothing is so luxurious
as paying attention.”*

*Let's remember
&
reconnect to our essence.*

It is so easy to be swept into the
world of living vicariously
through television, movies,
social media and the numerous other
stimulations around us today.

Over the past few generations,
childhood has moved indoors.

Our disconnect with nature has not only
taken away something undeniably intrinsic from
our own mental, emotional, and
physical nourishment, but from our kids' as well.

We at Ecoville truly believe

*even in small doses,
nature can be a potent elixir.*

Imagine a small,
family owned and nurtured organic farm,
located only 3 kms
from the Balewadi Stadium in Pune.
A quaint farm located within the city.
This is what we are!

Everything we grow on the farm is 100% organic.
We enjoy an abundance of chemical-free, fresh,
all natural, organically grown produce.

We strongly believe in preserving soil health,
reusing-recycling-conserving-harvesting
natural resources, growing food
with open pollinated seeds,
and implementing traditional wisdom.

There is nothing more rewarding than seeing a
basketful of freshly picked Mangoes, Chikkooos,
Coconuts or the other flowers, fruits and vegetables.

The Farm today,
bears witness to a few decades of loving care.

Nearly 25 years ago we planted 200 Mango,
60 Chikkoo and 120 Coconut saplings along with
other fruit bearing varieties such as Banana, Lichee,
Guava, Tamarind, *Jamun* & Jackfruit.
Also several floral plants like Hibiscus,
Son-chafa, *Bakuli*, *Hadga*, *Prajakta*,
Double Taggar, *Bahawa*, *Gulmendi*, *Krushnakamal*,
Hypomia Harshawardhan, *Khambarjia*, *Ranjai*,
Kawti-chafa, *Kewda* and many more
adorn the farm land.

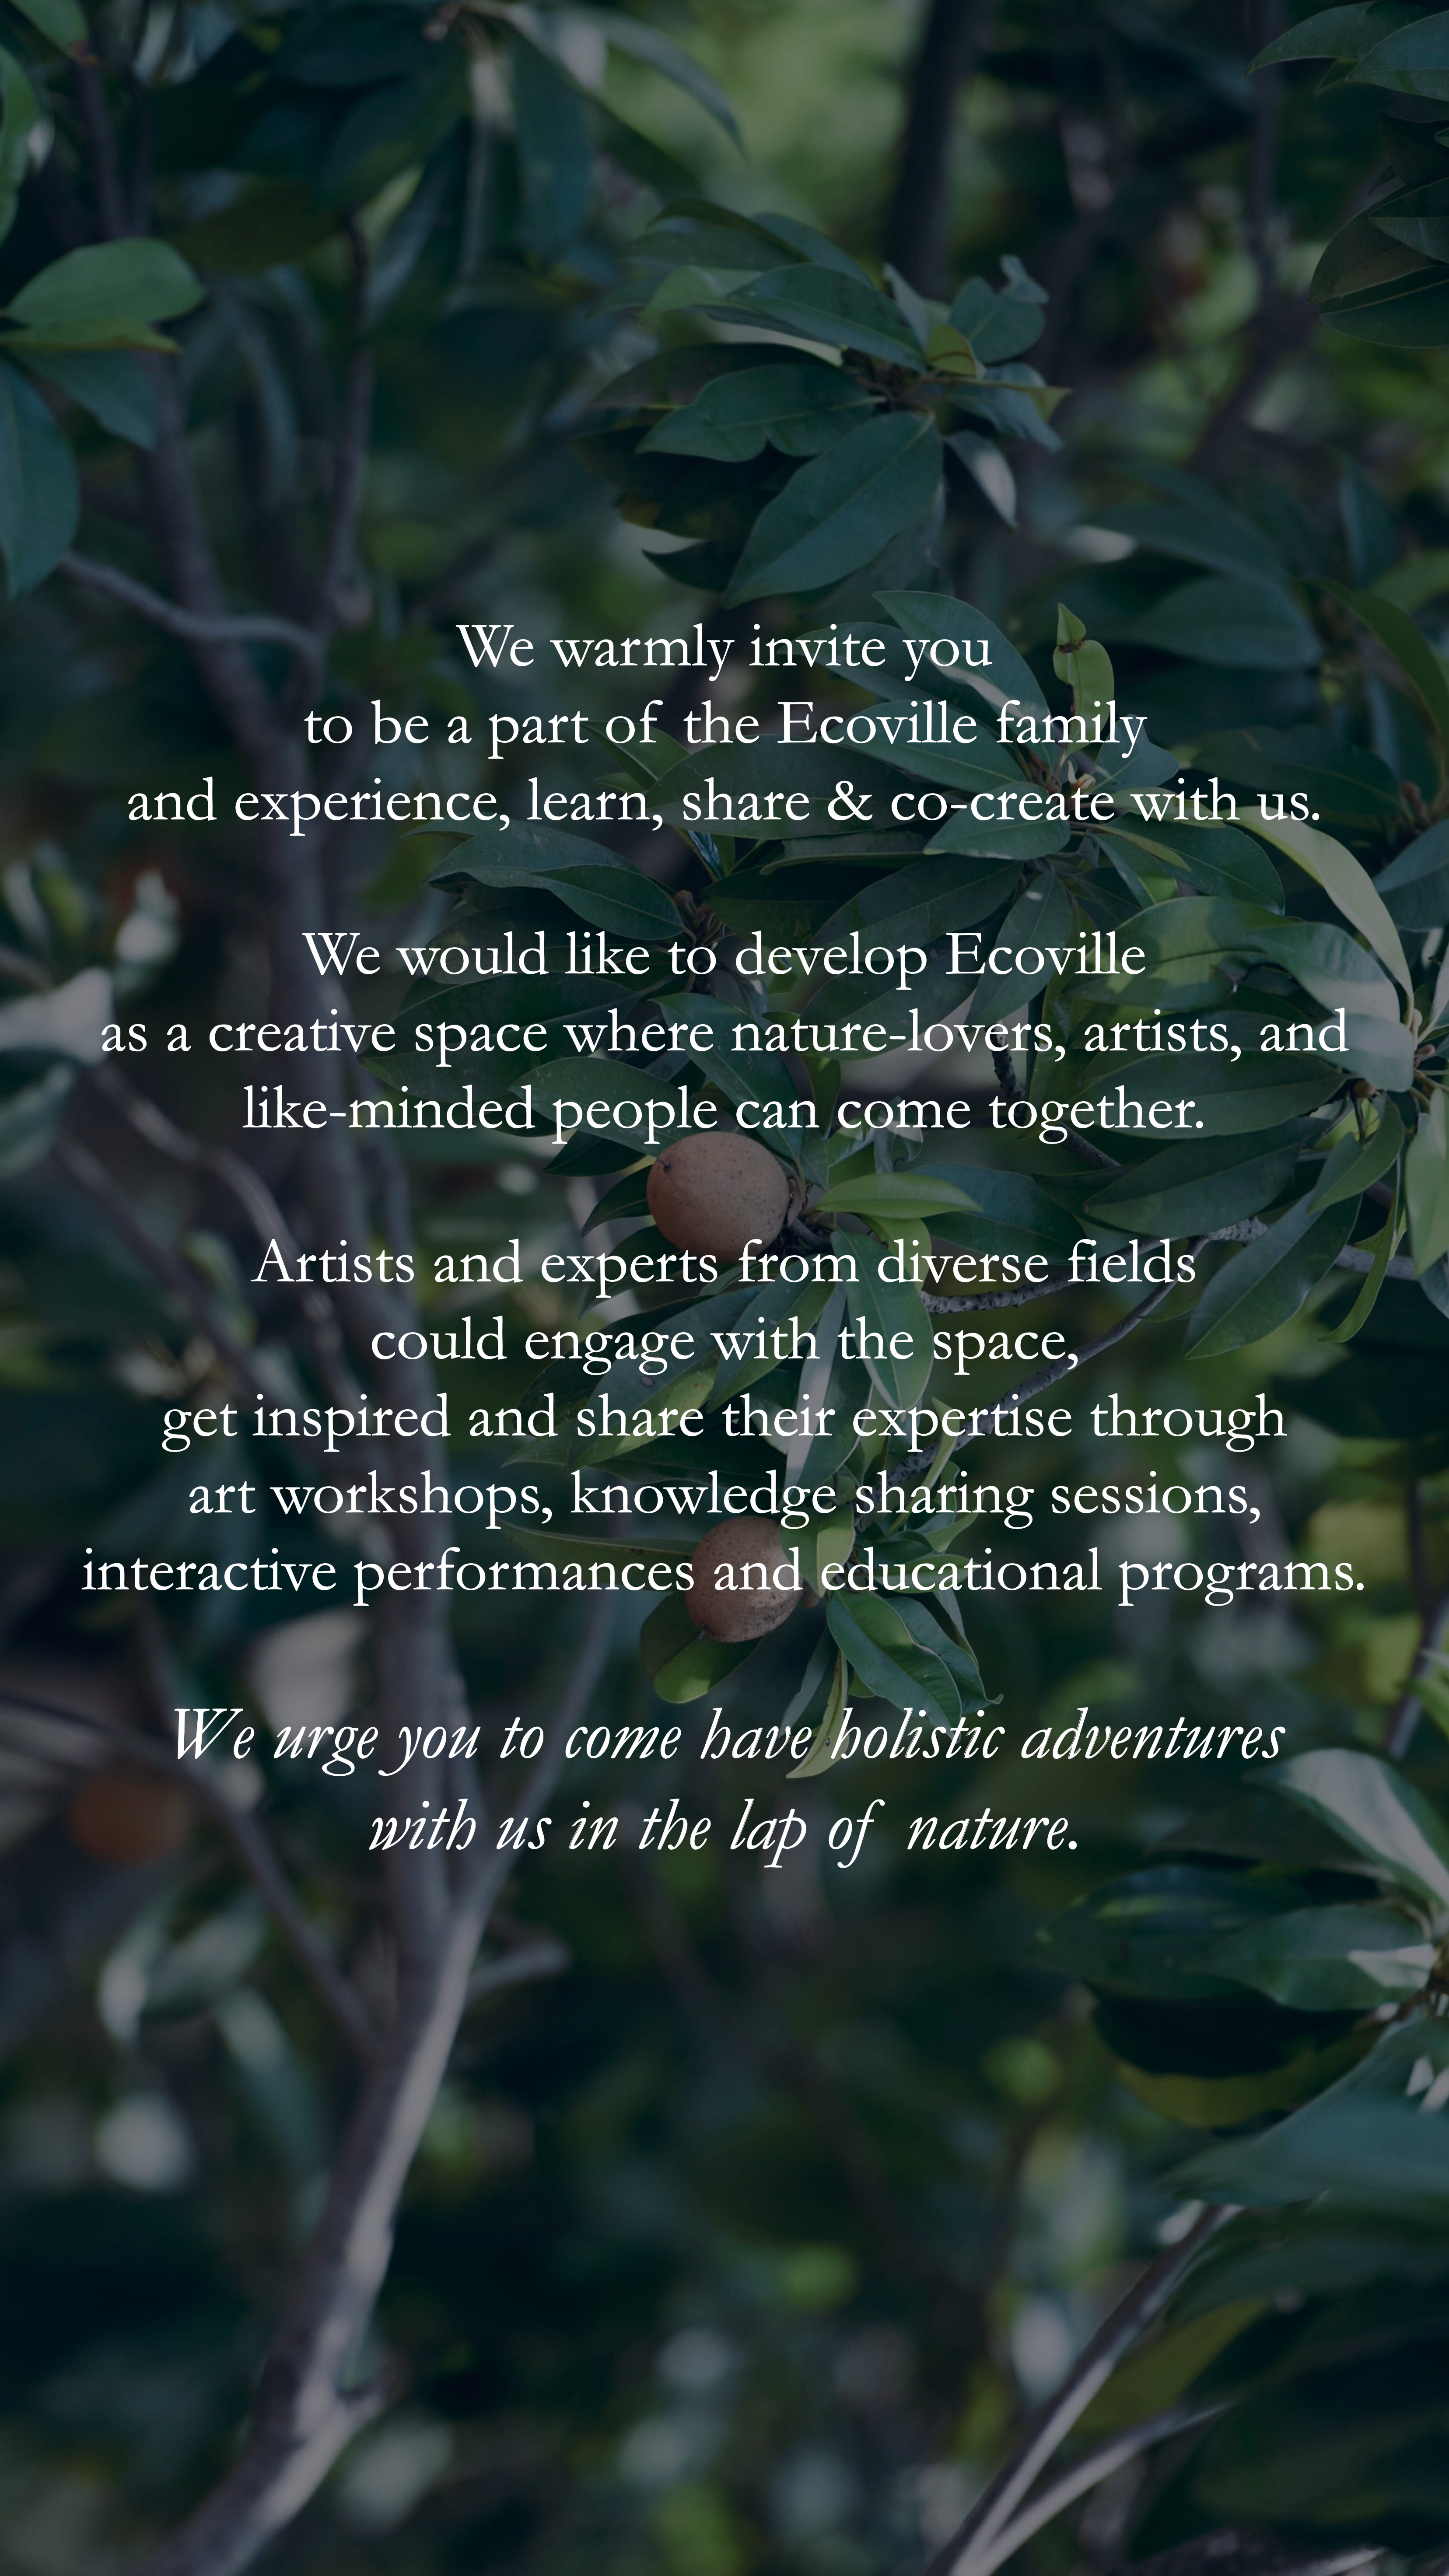

A portion of Ecoville has been exclusively reserved for developing a vegetable garden where a variety of organic vegetables are cultivated for kids to experience the beautiful process of growing their own food.

Lovingly as we tend to our plants, we are attentive and mindful caregivers of animals as well.

As an animal friendly space, we welcome your pets to lounge and play at Ecoville.

We warmly invite you
to be a part of the Ecoville family
and experience, learn, share & co-create with us.

We would like to develop Ecoville
as a creative space where nature-lovers, artists, and
like-minded people can come together.

Artists and experts from diverse fields
could engage with the space,
get inspired and share their expertise through
art workshops, knowledge sharing sessions,
interactive performances and educational programs.

*We urge you to come have holistic adventures
with us in the lap of nature.*

EXPERIENCES THAT NURTURE...

Ecoville offers an opportunity to disconnect with technology and *reconnect with nature*.

Our sole intention is to encourage kids to embrace a lifestyle devoid of excessive digital influence, where they understand the *science* and *magic* of *life* and *creation* through farming.

This would also teach them how our food is grown, what a life cycle is and how hard work results in sweet rewards.

This is the one place where you wouldn't mind your kids getting themselves dirty.

Throughout the year we plan on designing and hosting various *workshops*, *events*, *eco-retreats*, *intimate musical concerts*, *knowledge sharing sessions*, *pet picnics*, *outdoor movie nights*, etc. for kids, artists and anyone who loves to learn something new whilst spending time with nature.

Ecoville will also offer
a delightful co-working space
for artists to co-create and work
with fellow artists in the midst of nature.

Our signature Mango Picking Festival
let's everyone enjoy the experience
of picking our flavorful organic mangoes
right from the trees.

We have a lot of dreams and ideas for Ecoville
and we hope you come along with us
on this wondrous journey!
